WORK EXPERIENCE

Software Developer Intern Feb 2026 – Present

LMS Athena — Onsite

- Developed new features for a SaaS LMS using React.js, Node.js, and REST APIs.
- Integrated AWS S3 for scalable media storage, reducing upload latency by an estimated 35%.
- Participated in daily Agile stand-ups, sprint planning, and peer code reviews in a cross-functional team.

Web Development Intern

May 2025 – Jul 2025

COER University — Roorkee, Uttarakhand

- Rebuilt and maintained the official university website, improving mobile responsiveness.
- Implemented on-page SEO improvements (meta tags, semantic HTML, image optimisation).
- Reduced average page load time by optimising CSS and compressing assets.

Software Developer Intern

Feb 2025 – May 2025

HashedBit Innovations Pvt. Ltd. — Remote

- Contributed to live production features using React.js and Node.js in an Agile team environment.
- Debugged and resolved critical UI issues, improving component render performance.
- Gained hands-on experience with production deployment workflows, Git branching, and code reviews.

PROJECTS

Foodio — Production-Grade Food Ordering Platform

[Live](#) | [GitHub](#)

React.js · Node.js · Express.js · MySQL · Redis · Socket.io · AI · Razorpay · Tailwind CSS

- Built a production-ready food ordering platform with real-time WebSocket order tracking (Socket.io), covering full order lifecycle with status updates under 100ms.
- Integrated AI to power a conversational food chatbot with multi-turn memory, personalised recommendations, and time-aware meal suggestions.
- Designed REST API endpoints with Swagger/OpenAPI 3.0, including Redis-cached autocomplete and advanced filters.
- Implemented JWT auth, bcrypt hashing, OTP-based reset, rate limiting, SQL injection prevention, and RBAC (Admin/User).
- Integrated Razorpay payments.

AI-Tripmate — AI-Powered Trip Planner

[Live](#) | [GitHub](#)

React.js · Spring Boot · MongoDB · Google OAuth2

- Designed a trip planning web app that uses AI to generate personalised itineraries with destination summaries.
- Integrated Google OAuth2 for secure SSO authentication — zero custom credential storage required.
- Built RESTful APIs in Spring Boot for trip creation, updates, and AI recommendation retrieval.
- Delivered a responsive UI with dynamic destination cards, search, and trip history.
